

**NAME:** Space Art Crayon Resist

[ORIGINAL LINK](#)

**MATERIALS:**

- Crayons
- Paper (cardstock preferred)
- Paintbrush
- Black watercolor or watered down craft paint
- Paper towels

**STEPS:**

1. Start by coloring a space scene on the paper. Draw stars, planets, shooting stars, rockets, aliens, etc. Color them in completely with the crayons. The more solid the crayon coverage, the better the end result of the space art.

2. Brush over the whole paper with the black watercolor paint. The waxy crayon won't absorb the paint and it beads up a little on top.

3. Pat with a paper towel to clean off paint that beads up on the crayon.

4. Let dry, and display your beautiful space picture.
